

Wireless skip rope

SKU: TESPORSTSKIPROPE

Smart Skip Rope, calories monitor and activity control, Go Life app compatible with devices from iOS 8 and later, Android 4.3 and later, Bluetooth 4.1

Skipping over a rope is an effective way to shed excess pounds and to do your daily work out. Not only is this an aerobic exercise, it is also a more complete form of training than, for example, jogging. For this reason, SBS has designed a "wireless rope" which will synch with the Go Life app to accurately measure how many calories you burn as you work out. This accessory is also suited to rank beginners because it lacks the central link of rope, meaning you can work out efficiently, even in confined spaces and without any difficulty or danger.

Features:

- Wireless
- Suitable for small spaces
- Ideal for beginners
- Synchronised with the free Go Life app
- Compatible with devices from iOS 8 and after
- Compatible with devices from Android 4.3 and later

To use this smart skip rope, you will need to download the free Go Life app that was developed by SBS, available for iOS (8.0 and later) on the [AppStore](#) and Android (version 4.3 and later) on [Google Play](#).
